A

Absorption of D-glucose *in vivo* in the toadfish and the rainbow trout, 421
Abstracts of papers presented at the Marine Biological Laboratory, 402
Acetylcholine and synaptic potentials in skate electroplaques, 428
Acetylcholinesterase activity in eserine-treated ascidian embryos, 239
Acrosome reaction in spermatozoa of *Lumbricus*, 424
Activity, chromatophorotropic, of the central nervous system of the horse-shoe crab, 422
Adaptation, light- and dark-, in the skate retina, intracellular responses during, 419
retinal, in the skate, electrical and photochemical signs of, 405
of *Fundulus* embryos to oxygen tensions, 435
properties of squid photoreceptors, 433
Adaptations, behavioral, of amphibious fishes, 115
Adenine, 1-methyl, in the starfish, distribution and metabolism of, 439
Adenosine, effect on coelomocyte aggregation in *Cucumaria frondosa*, 549
nucleotides, effect on coelomocyte aggregation, in *Cucumaria frondosa*, 549
1-methyl, effect on gonads and oocytes of the starfish of, 435
Adhesive used in repair and reattachment in barnacles, 333
Aequipecten irradians, a biochemical comparison of ciliary and flagellar axonemes of, 429
Aggregation of amebocytes of the horseshoe crab, 426
of coelomocytes in *Cucumaria frondosa*, effect of ethylenediamine-tetraacetate, adenosine, and adenosine nucleotides on, 549
of some starfish coelomocytes, 418
Airbreathing, control of in fishes, 115
Aliphatic sesquiterpenes, specific juvenile hormone effects in 222
Allelic variation in *Mytilus*, electrophoretic studies of, 430
ALLEN, G. E. T. H. Morgan, Richard Goldschmidt and the opposition to Mendelian theory 1900–1940: a chapter in the history of biological ideas, 412
Alpha-crystallin from the ocular lens of the dogfish, reversible de-aggregation of, 428
Amoebocytes, role in the regeneration of shell in the land pulmonate, 502
and shell repair in the land pulmonate, 502
of the horseshoe crab, aggregation of, 426
Anabaseine, chemistry and biology of, 408
Annelid, endocrinology and reproductive biology of, 461
Annual Report of the Marine Biological Laboratory, 1
Antigens, histocompatibility, immunologic reactivity to, 410
APLEY, M. L. See W. D. RUSSELL-HUNTER, 434
Arbacia, phosphorylation of nuclear protein following fertilization in, 425
eggs, movements of echinochrome granules during the early development of, 415
Arbacia punctulata, effect of temperature on the efflux of calcium from the eggs of, 417
eggs, effect of fertilization on the calcium and magnesium content of, 413
eggs, peripheral membrane system of, 425
nuclear localization of sialic acid in the unfertilized eggs of, 426
uptake and use of amino acids by, 296
ARNOLD, J. M. AND L. D. WILLIAMS-ARNOLD. The effects of cytochalasin B on cytoplasmic movement, cleavage, and subsequent development of the squid embryo, *Loligo pealei*, 413
Artemia, effects of gamma irradiation on, 363, 375
female reproductive performance of, 375
life spans and male reproductive performance of, 363
Arthropod molting, control of by ecdysones, 520
Ascidian embryos, eserine-treated, acetylcholinesterase activity in, 239
Ascidians, effects of Cytochalasin B on tail resorption in, 427
Assay for ecdysone, evaluation of "*Calliphora* Test" as, 138
Asterias forbesi, permeability and structure of cellular junctions in embryos of, 440

Byrsotria fumigata, physiology of the reproductive cycle in, 447

C

Calcification in echinoderms, 151
Calcification in the land pulmonate, 502
Calcium and magnesium content of *Arbacia* eggs, effect of fertilization on, 413
from *Arbacia* eggs, effect of temperature on the efflux of, 417

spikes in crayfish muscle fibers, parallel changes in the thresholds of current induced tensions and, 430
Calcium-45 incorporation *in vitro* by regenerating spines of *S. pupuratus*, effects of temperature and diamox on, 151
"*Calliphora* Test," evalution of as an assay for ecdysone, 138
Campanularia flexuosa, effect of puromycin on the growth pattern of, 443
Canals, study of in some balanid barnacles, 164
Carassius auratus, effects of superabundant oxygen on thermal tolerance of, 229
Carbonic anhydrase, effects of an inhibitor (Diamox) of, on calcification in regenerating sea urchin spines, 151
Carcinus maenas, a virus disease of, 414
microspectrophotometry of visual pigment and spectral sensitivity of retinular cells in, 416
water permeability of, 351
CASE, J. F., G. T. REYNOLDS, J. BUCK, J. BURNS AND R. HALVERSON. Comparative physiology of neurally controlled luminescences, 417
See J. BUCK, 417
CASS, A. See P. B. DUNHAM, 420
Cecropia silkworm, origin, distribution and fate of the molting fluid proteins of, 277
Cellular junctions in the starfish embryo, permeability and structure of, 440
Cement duct network in barnacles, 333
Cement glands in some balanid barnacles, a comparative study of, 164
Cement glands of barnacles, 164, 333
Cement hardening mechanism in barnacles, 333
Cementing apparatus of barnacles, 164, 333
Cementing mechanism in balanidae, 333
CHAMBERS, E. L., R. AZARNIA AND W. E. MCGOWAN. The effect of temperature on the efflux of 45_{Ca} from the eggs of *Arbacia punctulata*, 417
See R. AZARNIA, 413
Chaoborus americanus, interaction of food and photoperiod in the termination of larval diapause in, 476
Chelicerate arthropods, control of molting in by ecdysones, 520
Chesapeake Bay jellyfishes, observations on and toxins of, 180
CHILDS, J. N. III. Failure of coelomocytes of some *Asterias forbesi* to clump on glass, 418
CHIU, K. W., W. G. LYNN AND J. P. LEICHNER. Environmental temperature and thyroid activity in the lizard, *Sceloporus occidentalis*, 107
See P. F. A. MADERSON, 304
Chlamydomonas reinhardii, sole food organism in the monoxenic cultivation of daphnidae, 321
Choroid retes of scup and striped bass, 444
Chromatophorotropic activity of the central nervous system of the horseshoe crab, 422
Chrysaora (*Dactylometra*) *quinquecirrha*, observations on and toxins of, 180
CIANCI, L. See T. A. BORGESE, 416
Cilia, changes following negative staining of microtubules of, 265
Ciona intestinalis embryos, acetylcholinesterase activity in, 239
Cirripedia, comparative study of the cement glands in, 164
repair and reattachment in, 333
CLARK, W. H., JR. AND G. W. HINSCH. Ultrastructure of the secondary septa of *Metridium* sp., 406
Clingfish, amphibious Chilean, emersion of, 115
CLONEY, R. A. See J. LASH, 427
Clytia, hydroids, life cycle of, 203
Cnidaria: toxin of jellyfishes from Chesapeake Bay, 180
Cobra venom factor, variations in *Limulus* inducible lysin induced by, 423
Cockroach, physiology of the reproductive cycle in, 447
regulation of nerve activity in the phallic nerve of, 405
Coelenterata: toxin of jellyfishes from Chesapeake Bay, 180
Coelenterates, luminescence and fluorescence in, 430
Coelomocyte aggregation in *Cucumaria frondosa*, effect of ethylenediamine-tetraacetate, adenosine, and adenosine nucleotides on, 549
morphology, changes during aggregation, 549
Coelomocytes of some starfish, failure to clump on glass, 418
COHEN, C. See Y. LENSKY, 277
COHEN, L. B., D. LANDOWNE, B. B. SHRIVASTAV AND J. M. RITCHIE. Changes in fluorescence of squid axons during activity, 418
Cold exposure, effect on protein synthesis in the hepatopancreas of the spider crab of, 421
Collocalia vanikorensis granti, sensitivity of echolocation in, 495

Colony morphology, influence on reproductive potential in Ectoprocta of, 426
Coloration, protein, modification of interactions between lenses and UV light by, 444
Competence, bacterial, enzyme changes associated with development of, 411
Complement system of vertebrates, similarities of inducible lysin in *Limulus* to, 423
Continuous culture of *Daphnia*, 485
Control, neural, of luminescence, comparative physiology of, 417

Statistical phenotype concept applied to skeletal variation in the mouse, 416
STEINBACH, H. BURR, Director's Report, 7
STELL, W. K., H. G. WAGNER AND M. L. WOLBARSHT. Receptive field organization of ganglion cells in the retina of the smooth dogfish, *Mustelus canis*, 437
Stenotomus versicolor, choroid retes of, 444
STEPHENS, R. E. Isolation of nexin—the linkage protein responsible for maintenance of the nine-fold configuration of flagellar axonemes, 438
STEPHENSON, J. E. See C. K. BARTELL, 415
Stimulation and control of airbreathing in fishes, 115
Stinging cells of jellyfishes from Chesapeake Bay, 180
Strongylocentrotus purpuratus, uptake and use of amino acids by, 296
Strongylocentrotus purpuratus regenerating spines, effects of temperature and diamox on incorporation of calcium-45 *in vitro* by, 151
STUNKARD, H. W. Species of *Renicola* (Trematoda) in the kidneys of the gull, *Larus argentatus*, 438
SUAREZ-KUREZ, G., P. W. BRANDT AND J. P. REUBEN. Parallel changes in the thresholds of current induced tensions and Ca-spikes in isolated crayfish muscle fibers, 439
SULLIVAN, W. D., S.J. AND E. M. O'BRIEN. Intranuclear microtubules during growth and division in *Tetrahymena pyriformis* Gl., 409
Supercooling in fish, 574
SUTHERS, R. A. See D. R. GRIFFIN, 495
Swiftlets, cave, sensitivity of echolocation in 495
Synaptic organization of the oculomotor nucleus, 442
potentials and acetylcholine in skate electroplaques, 428
Synthesis, DNA, during regeneration in *Tubularia*, 440
Synthesis, macromolecular, reversible inhibition of by levorphanol, 404
Synthesis, RNA, in starfish oocytes, studies of, 436
Synthetic and natural materials with insect hormone activity, 222

T

Tabun, in relation to nerve function, enzymatic hydrolysis of, 407
Tail resorption in ascidians, effects of Cytochalasin B on, 427
TASAKI, I. See A. WATANABE, 441
Taxonomy of *Phialidium gregarium*, 203
Tellina agilis, territoriality observed in a population of, 423
Temperature, effect on incorporation of calcium-45 *in vitro* by regenerating spines of *Strongylocentrotus purpuratus*, 151
effect on the efflux of calcium from *Arbacia* eggs of, 417
environmental, and thyroid activity in a lizard, 107
subzero, effect on serum osmolality in the winter flounder, 574
Terminals, presynaptic, of an axon innervating crayfish muscle, differences in blocking frequency of, 432

Territoriality in a population of *Tellina*, 423
Tetrahymena pyriformis, intranuclear microtubules during growth and division in, 409
Thermal tolerance of goldfish, effects of superabundant oxygen on, 229
Thyroid activity and environmental temperature in a lizard, 107
Toadfish, radiothyroidectomy of, 424
TOOLE, B. AND J. GROSS. Hyaluronate and hyaluronidase in the blastema of the regenerating newt limb, 403
TOOLE, B., S. HULL, E. L. SHIPPEE AND A. W. SCHUETZ. Distribution and metabolism of 1-methyl adenine in the starfish during shedding and oocyte maturation *in vitro*, 439
TOWNSEND, K. See H. GEWURZ, 411
TRAGER, W. See E. WEIDNER, 443
Trawling stress, effect on serum osmolality in the winter flounder, 574
Trematoda in the kidneys of the gull, 438
TRINKAUS, J. P. See P. B. DUNHAM, 420
TSUJI, F. I., R. V. LYNCH, III AND Y. HANEDA. Studies on the bioluminescence of the marine ostracod crustacean *Cypridina serrata*, 386
Tubularia, DNA synthesis during regeneration in, 440
  temporal characteristics of pacemaker inhibition in hydranths of, 434
Tunicate, ultrastructure and intracellular responses of photoreceptors of, 414
TUPPER, J. T., K. S. WITTMAN AND J. W. SAUNDERS, JR. Permeability and structure of cellular junctions in the starfish embryo, 440
Turbellarian, gastrulation in, 539
TWEEDELL, K. S. DNA synthesis during regeneration in *Tubularia*, 440
TYLER, ALBERT, memorial of, 9

U

Uca pugilator, analysis of the color changes induced by serotonin and LSD in, 407
  comparison of melanophorotropic hormones from the pituitary of the dogfish with those from the eyestalk of, 415
Uca pugnax, biochemical changes in the digestive gland following eyestalk extirpation of, 437
Ultrastructure of intranuclear microtubules during growth and division in *Tetrahymena pyriformis*, 409
  of photoreceptors of *Salpa*, 414
  of spermatozoa of *Lumbricus*, 424
  of spermatozoon of the earthworm, 403
  of the peripheral membrane system of sea urchin eggs, 425
  of the secondary septa of *Metridium* sp., 406
  of the synaptic organization of the oculomotor nucleus, 442
UMMINGER, B. L. Effects of subzero temperatures and trawling stress on serum osmolality in the winter flounder, *Pseudopleuronectes americanus*, 574

V

Variation, allelic, in *Mytilus*, electrophoretic studies of, 430
  biological, and metabolic controls, 406
  interpopulation, in shell components in *Ferrissia*, 402
  skeletal, in the mouse, statistical phenotype concept applied to, 416
VAUGHN, J. C. AND G. W. HINSCH. Absorbance melting profile analysis of DNA and chromatin in somatic cells and sperm of the spider crab, *Libinia emarginata*, 441
Venom of *Paranemertes peregrina*, 80
Virus disease of the shore crab *Carcinus maenas*, 414
Visual pigment of retinular cells in the crab, microspectrophotometry of, 416
Vitamins and sustained fertility of *Daphnia*, 485
  (water soluble) used for the monoxenic cultivation of Daphnidae, 321

W

WAGNER, H. G. See W. K. STELL, 437
WATANABE, A., I. TASAKI AND M. HALLETT. Fluorescence analysis of the excitation process in nerve using hydrophobic probes, 441
Water permeability of *Carcinus maenas* as a function of salinity, 351
  of *Fundulus* eggs, 420
WAXMAN, S. G. AND G. D. PAPPAS. Synaptic organization of the oculomotor nucleus: a comparative electron microscopic study, 442
WEATHERLEY, A. H. Effects of superabundant oxygen on thermal tolerance of goldfish, 229
WEIDNER, E. AND W. TRAGER. Structure and function of microsporidian spores, 443
WEISSMANN, G., P. DUKOR AND R. ZURIER. Mechanisms of lysosomal hydrolase from phagocytic cells, 408
WHITTAKER, J. R. See D. FROMSON, 239
WIEDERHELD, M. L. AND E. F. MACNICHOL, JR. Only decreases in illumination elicit spike responses in the siphonal photoreceptor system of the hard-shell clam, *Mercenaria mercenaria*, 442

WILLIAMS-ARNOLD, L. D. See J. M. ARNOLD, 413
WILSON, D. B. On immunologic reactivity to histocompatibility antigens, 410
Winter flounder, effects of subzero temperatures and trawling stress on serum osmolality in, 574
WITTMAN, K. S. Effect of puromycin on the growth pattern of *Campanularia flexuosa*, 443
WITTMAN, K. S. See J. T. TUPPER, 440
WOLBARSHT, M. L. See W. K. STELL, 437
WOLLEY, R. C. AND D. E. COPELAND. The choroid retes of scup, *Stenotomus versicolor* and striped bass, *Roccus saxatilis*, 444
WOS, J. D. See D. B. DONNER, 419

Y

Yolk-cell mass in *Hydrolimax grisea*, 539
Yolk cells and cleavage furrows in *Hydrolimax grisea*, 539
YULE, T. See S. ZIGMAN, 444

Z

ZDAREK, J. See G. FRAENKEL, 138
ZIGMAN, S. Isoelectric focusing of lens gamma (γ) crystallins, 409
T. YULE AND G. GRIESS. How protein coloration modifies interactions between lenses and UV light, 444
ZULETA, A. See A. W. EBELING, 115
ZURIER, R. See G. WEISSMANN, 408
